Academic Background

Web Development Diploma
Lighthouse Labs - Graduated April 2022

General Arts and Science Diploma
Humber College - Graduated April 2017

Projects

Portfolio Site

A portfolio site showcasing projects that I created or collaborated on. It is fully responsive and cross-browser compatible to ensure accessibility to a large variety of users. Hosted on Hostinger and utilizes Email JS API for email communication.
Tech Stack: Node, React, SCSS, Swiper JS.

ResourceWall

A Full Stack Educational resource management tool where users can create a new resource with an embedded link, search for already saved resources, and categorize their resources.
Tech Stack: Node, Ajax, SCSS, BootStrap, Express, PostgreSQL

Tweeter

A Twitter clone that focused on front-end development and responsive design.
Tech Stack: Node, Express, HTML, CSS, jQuery, Ajax

Work it Out

A workout app that allows users to look up certain exercises and create custom workouts within the app, created with a mobile-first design, fully responsive so it can be viewed in the browser too.
Tech Stack: React, React Router, SCSS, MaterialUI, Express, PostgreSQL

Work experience

Corporate Account manager

Bank of Montreal — June 2016 - August 2019, January 2020 - August 2021

- Maintained a professional relationship with corporate customers
- Managed the onboarding of new clients to the corporate card system
- Managed a portfolio of 35 corporate clients totaling roughly 350 million dollars in annual spending
- Oversaw training and navigation of the online accounting platform with our clients
- Resolved escalated issues when complex problems would arise and conducted thorough investigations to prevent further escalations

Corporate Migration specialist

Bank of Montreal — September 2019 - January 2020

- Oversaw the migration of 25 large corporate clients from our legacy accounting program to the newest one
- Managed and organized sensitive client data while transferring it
- Coordinate conference calls to ensure the data transfer was correct, assist clients with navigation, display new features, and answer any questions regarding the new software
- Assist the clients for a two week period to ensure they were comfortable navigating the platform
